FOREWORD

This brochure presents all of the amendments to the Nomenclature appended to the International Convention on the Harmonized Commodity Description and Coding System which have been accepted as a result of the Customs Co-operation Council Recommendation of 26 June 2004.

All of the legal texts of the amendments have been reproduced and their background, nature and scope are briefly explained. The amendments are commented on individually item by item.

The introduction sets out the origin and general scope of the updating project and outlines the rules for assigning code numbers to the subheadings created or amended. The Annexes provide specific information on the scope of the amendments.

This brochure is designed to facilitate the interpretation and implementation of the legal texts but is only a guide and has no legal status.

INTRODUCTION

I. Background to the updating of the Harmonized System

The Preamble to the International Convention on the Harmonized Commodity Description and Coding System emphasizes the importance of ensuring that the Harmonized System is kept up to date in the light of changes in technology and patterns of international trade.

Article 7 of the Convention further states that it is for the HS Committee to propose such amendments to the Convention as may be considered desirable, having regard, in particular, to the needs of users.

At its First Session, the HS Committee decided to set up the Harmonized System Review Sub-Committee, which has the task of revising the HS in accordance with the Committee's general indications and preparing the necessary amendments to the HS Nomenclature.

The Committee also agreed to allow an interval of four to six years between each Recommendation amending the HS Nomenclature under Article 16 of the Convention.

In this context, it was decided to effect a general review of the HS Nomenclature, and a draft amendment was submitted to the Council by the HS Committee on the basis of the texts drawn up by the Review Sub-Committee.

At its 103rd/104th Sessions held in Brussels from 24 to 26 June 2004, the Council adopted the Article 16 Recommendation amending the Harmonized System.

On 14 July 2004, the Secretary General of the WCO notified Contracting Parties of the amendments adopted by the Council, drawing attention to Article 16.2 of the Convention which stipulates that any Contracting Party may notify the Secretary General of an objection to a recommended amendment.

Not having received any objections, the recommended amendments were deemed to be accepted and will enter into force on 1 January 2007 in accordance with Article 16.4 (b) of the Convention.

II. General scope of the amendments

This Recommendation is the fourth to amend the Harmonized System under the Article 16 procedure since the Council approved the Harmonized System Convention in 1983, though it is only the third to make major amendments of the Harmonized System. This Recommendation includes 354 sets of amendments, divided as follows : agricultural sector 41; chemical sector 75; paper sector 13; textile sector 46; base metal sector 20; machinery sector 57; other sectors 102.

This review cycle emphasizes on the simplification of the Harmonized System and the Committee confined itself to examine matters linked to changes in technology or patterns of international trade. The opportunity was also taken to clarify certain texts in order to facilitate the uniform application of the HS and to provide legal certainty with regard to classification decisions taken by the Committee. Other texts have been amended to render them more consistent with scientific or customary terminology or with trade practice.

Environmental and social concerns are other major features of this Recommendation. Many amendments relate to the protection of the **environment** (e.g. creation of new subheadings for the identification of certain species of fish, the monitoring and control of products of bamboo (INBAR (FAO)), pesticides (Rotterdam Convention), of ozone-depleting substances (Montreal Protocol) and products containing asbestos).

The following examples show other main sources of the amendments made to the Nomenclature:

- **Technological progress** : The amendments include for instance a revised definition of computers – or automatic data processing machines as they are called in the HS – to reflect that these machines are basically all digital and clarification of the classification of separately presented printers, network equipment, loudspeakers, microphones, cameras, and monitors and projectors used in conjunction with a computer. Other classification problems encountered in the hi-tech area have been solved, such as problems that a lot of electronic equipment available today is capable of performing several functions , e.g. a mobile phone with build-in camera or an MP3 player or multi-function office machines.
- **Trade patterns** : Deletion of 203 subheadings and 29 headings on account of the low volume of trade (see Annex A); modification of the structured nomenclature of headings (e.g., heading of Chapter 44.10 for oriented strand board or of heading 73.04 for steel pipes and tubes) to take account of changes in trade patterns.
- **Clarification of texts to ensure uniform application of the HS** : Amendment of the text of heading 44.18 concerning assembled flooring panels and of subheading 0406.40 concerning blue-veined cheese or of subheading 2208.40 clarifying the classification of Cachaça or the regrouping of all types of vacuum cleaners in heading 85.08.
- **Adaptation of the Nomenclature to reflect trade practice** : new subheadings have been created for cut flowers in heading 06.03, macadamia nuts in heading 08.02 , bamboo shoots in heading 20.05 and drinking glasses in heading 70.13.

The amendments therefore reflect changes in trade and technology but, in addition, they reinforce the multipurpose nature of the Nomenclature by taking account of the needs of the various users.

III. Assignment of code numbers to amend subheadings

The HS Nomenclature's objectives include the facilitation of international trade and the collection, comparison and analysis of trade statistics. To achieve these objectives, the stability of the HS structure and the historical continuity of trade statistics have to be maintained.

Given the intervals at which the HS is reviewed and the scale of the amendments in the Recommendation of the last review cycles and their impact on the structure of the HS Nomenclature, it proved necessary to lay down general principles regarding the numbering of new or modified subheadings and the reuse of deleted code numbers.

It was therefore decided to adopt the following rules **provided they are compatible with the structure of the HS** :

- (a) Code numbers are changed only where there is an amendment to the text of a heading or subheading **and** where there is a significant change of scope in the subheading(s) concerned.
- (b) The renumbering referred to in (a) above is confined to the **specific** subheadings (at one-dash level, fifth digit; or at two-dash level, sixth digit); the code numbers of those **residual** subheadings whose scope has been amended remain unchanged.
- (c) The code numbers of deleted subheadings are not reused until a certain period has elapsed, **unless** unavoidable.

It became clear, however, when finalizing the amended texts that the structure of the HS does not allow a uniform and systematic application of these principles, certain subheadings have been significantly modified in scope but retain the same code number (see Annex C). For example, code number 3006.10 has been maintained though the subheading has been expanded to cover sterile absorbable surgical or dental yarn and sterile surgical or dental adhesion barriers or the expanded scope of subheading 4103.90 including raw hides and skins of camels. The transfer of the latter subheading results from the amendment of Note 1 (c) to Chapter 41.

It is also pointed out that not reusing the code numbers of deleted subheadings disrupts the continuity (systematic order of the code numbers) adopted when the HS Nomenclature was prepared and leads to gaps in the numbering. By way of example, the first one-dash subheading of heading 85.28 is numbered '8528.41' whereas logically it should be '8528.11'. Similarly, heading 85.42 begins with subheading '8542.31' and not '8542.11'.

Explanation of the amendments

Notes

The table below shows only those parts of the Harmonized System, which are affected by the WCO Council Recommendation of 26 June 2004 to amend the Harmonized System. The amendments will come into effect on 1 January 2007.

The left hand column (HS 2002) contains the texts of relevant Section, Chapter or Subheading Notes, and headings and subheadings, as they presently exist (i.e., 2002 edition). The centre column contains the corresponding texts as they will read following the implementation of the Council Recommendation.

The underlined texts (except for the references to Chapters) indicate the HS 2007 amendments. However, editorial amendments have been omitted from this table and the left hand column shows the reference "omitted".

It should be noted that the content of a heading or subheading may have changed without the text of a heading or subheading being amended. For example, the scope of a residual subheading may have been expanded because of the deletion of a specific subheading within the same heading. In that case the deleted subheading is shown in the left hand column, while the centre column shows the reference "[deleted]".

- Table II	Correlating the 2002 version to the 2007 version of the Harmonized System	pages (2/1.) to (2/37.)

INTRODUCTION

This brochure contains the tables correlating the 2002 and 2007 versions of the Harmonized System, as drawn up by the World Customs Organization Secretariat in accordance with instructions received from the Harmonized System Committee.

Though these Correlation Tables were examined at a session of the Harmonized System Committee, they are not to be regarded as constituting classification decisions taken by that Committee; they constitute a guide published by the Secretariat and whose sole purpose is to facilitate implementation of the 2007 version of the Harmonized System. They do not have legal status.

During the discussions within the Review Sub-Committee and the Harmonized System Committee aimed at amending the HS Nomenclature, several differing views emerged concerning the present classification of certain goods, without the Committee ruling officially on their classification. It was agreed that the Tables should be as comprehensive as possible and thus include correlations supported by several Contracting Parties, even if the subheadings mentioned did not reflect the views expressed by the majority within the Committee. The Correlation Tables might be subject to further amendments or changes as appropriate. The most recent version is reproduced on the WCO Web site (www.wcoomd.org).

Table I establishes the correlation between the 2007 version and the 2002 version of the HS. It contains remarks opposite certain correlations briefly specifying the nature of the goods transferred. In many cases, reference has also been made to the amended legal provisions. In addition, where differing views emerged within the Harmonized System Committee concerning the present classification of certain goods, an annotation has been added opposite the subheadings concerned.

Table II establishes the correlation starting from the 2002 version. It is simply a mechanical transposition of Table I and therefore includes no remarks.
